## Notes:

1. The above weights and dimensions are typical figures for guidance only.
2. $\mathrm{CO}_{2}$ is sold by weight. The empty weight (tare weight) for $\mathrm{CO}_{2}$ cylinders will vary according to the build specification used. The weight of each cylinder is stamped into the cylinder shoulder. This may be shown in kilos and will normally include the weight of the cage and valve.
3. Mixed Gas is sold by pressure.
4. You should ensure that you understand the properties of carbon dioxide and know how to handle high-pressure gas cylinders safely before using the product. These are included in material safety data sheets, which should be made available in your premises. These can be obtained from Air Liquide UK Customer Services. Tel: 0800637737.
5. Where applicable, cylinder height includes valve guard or cap.
