Scope

On behalf of the Air Liquide UK, Vinçotte performed a claim validation of liquid nitrogen, liquid oxygen and liquid argon labelled “ECO ORIGIN” and sold by Air Liquide in 2025. The validation was performed by Vinçotte in accordance with the methodology and procedures set out in the Claim Protocol Validation report¹ and the Verification Protocol Report². The Claim Protocol and the Verification Protocol were developed according to the ISO 14020:2022 “Environmental statements and programmes for products – Principles and general requirements” and ISO 14021:2016 “Environmental labels and declarations – Self declared environmental claims (Type II environmental labelling)”.

The types of products concerned by the Claim are: liquid nitrogen, liquid oxygen and liquid argon (all qualities). To produce the quantities of aforementioned products, sold to the customers, Air Liquide UK is committed to:

- Use renewable electricity generated in the UK for the production of aforementioned products;
- To offset the CO2 emissions generated by the transport of the products to the customers by purchasing an equivalent amount of Verified Emission Reductions.

Declaration of independence

The validation was carried out by Vinçotte as an independent third party.

This statement may only be communicated and reproduced in its entirety and without change.

Conclusion

Based on the work undertaken, it is the conclusion of Vinçotte that:

- All direct electricity use coming from the production of aforementioned products are accounted for by purchasing the equivalent amount of renewable energy in the UK;
- The CO2 emissions generated by the transport of the products to the customers are accounted for by purchasing an equivalent amount of Verified Emission Reductions;
- The Product Carbon Footprint of aforementioned "ECO ORIGIN" products is correctly updated with the data of the year 2025.
